ABOUT OCM

Since 1999 **OCM** Construction Materials has been taking place in January, marking an annual start for construction shows in Moscow. Over the years it has become an important event for the building industry professionals, and the only event in Russia that reflects the real situation in the national construction materials market.

According to the organizers and exhibitors opinion, it is an effective tool for the promotion of construction products in the consumer market in Russia.

Both exhibitors and visitors share the opinion, that the exhibition creates a pleasant business environment and efficient working conditions. The organizers do their best, so that the participants can fulfill their expectations and achieve their set goals.

ABOUT CERAMBRICKTECH

The Show will take place within the frame of OCM, where practically all manufacturers of ceramic brick in Russia, Belarus and Ukraine are represented.

CERAMBRICKTECH has a clear focus on your business objectives.

Combining thematic exhibitions within the premises of the same site provides professionals with a unique opportunity to expeditiously obtain information on the entire range of equipment and technologies relevant to the ceramic industry.

The importance of such an event is bound, first and foremost, with the need of Russian and CIS companies in modern equipment for production, as well as modernization of existing enterprises.

Currently, brick manufacturers often face the necessity to update the enterprise machinery assets. The number of modern high technology brick factories in Russia and the CIS countries is not sufficient.

Therefore the emergence of the site to exchange the know - how, to showcase the latest achievements in equipment production and modernization of enterprises, will allow the industry professionals to be always aware of the latest innovations that are essential for making strategic decisions.
